10+ YEARS OF DESIGN EXPERIENCE

STRATEGY — UI/UX DEVELOPMENT

WHAT'S INSIDE

See what we do, how we work, and where we can take your next big idea.

01. Introduction ↗
02. Services ↗
06. Next Step ↗
03. Case Studies ↗
04. Who We Are ↗
05. Engagement ↗

✳ We build *digital* experiences that move ✳ *ambitious* businesses forward

CLEARER PRODUCTS
BRIGHTER GROWTH ↗

By bringing brand, product, and technology together, we help teams launch and scale with confidence

Our Core Proposition

Traditional agencies deliver polished visuals. **We build clear, scalable product systems** that help ambitious businesses grow.

Strategy ↗ Design ↗ Build ↗ Scale ↗

Scalable Systems

Design and build for long-term growth

Happier Customers

Better experience
Stronger relationships

The Problems We Solve

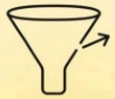

Design gaps can weaken customer trust and slow development. We help resolve the issues holding your business back.

01

Inconsistent brand experiences that weaken customer trust

02

Websites that attract visitors but fail to convert

03

Complex products that make everyday tasks difficult

04

Incomplete design handoffs that cause rework and delay launches

When your product is hard to use, **users leave and growth slows**. We help you fix what's holding your product back and **build better experiences that drive growth.**

Clear UX. Scalable systems.
DEVELOPMENT

Better product
experiences.

Our Design Process

We take your product from idea to launch in three phases: Discover the right opportunities, design better user experiences, and build a product ready to grow.

01

Discover

We uncover user needs, business goals, and product challenges through research.

02

Design

We transform those insights into intuitive flows, interfaces, and scalable systems.

03

Build

We bring the design to life with polished UI and developer-ready handoff.

Why Product-Led Design Matters

Poor product experiences lead to lower conversions and higher churn. Product-led design helps you improve usability, retain customers, and support long-term growth.

- Faster Onboarding
- Higher Conversion
- Stronger Retention
- Scalable Feature expansion
- Long-Term Brand Value

10 Years
Building digital products globally

Everything Your Product Need,
From Design to Development

Strategy & Research

We look beyond the obvious to understand your users, market, and product. By uncovering unmet needs and opportunities, we give every design decision a clear direction and a stronger business purpose.

Usability

UX/UI Design

Performance

Apps

Brand Systems

→

A strong brand is more than a logo. We create flexible systems that keep every product, campaign, and customer touchpoint visually aligned as the business grows.

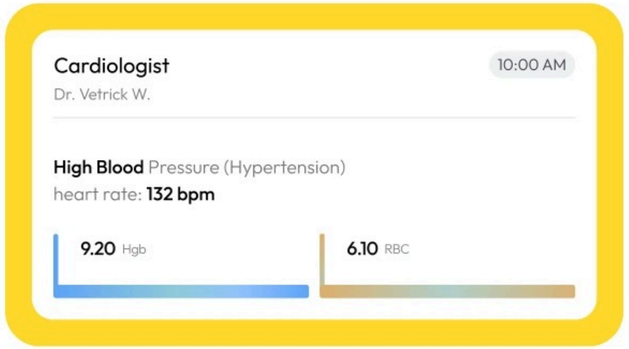

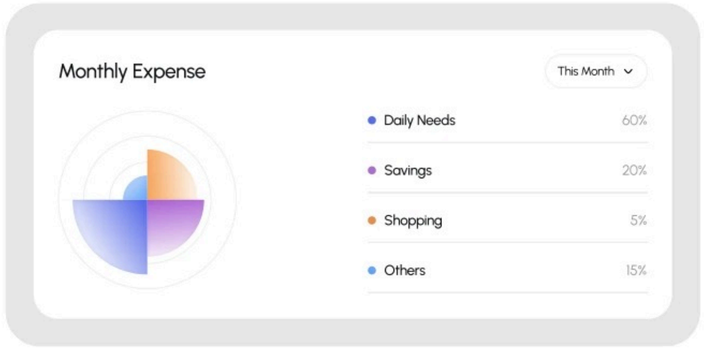

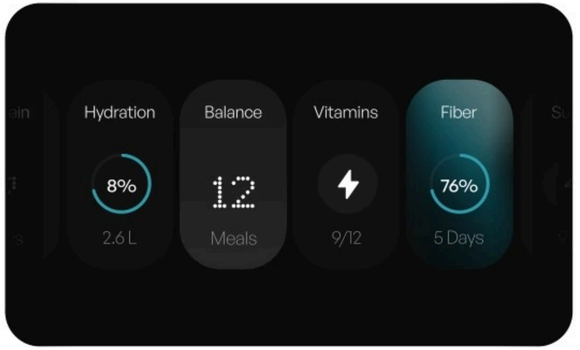

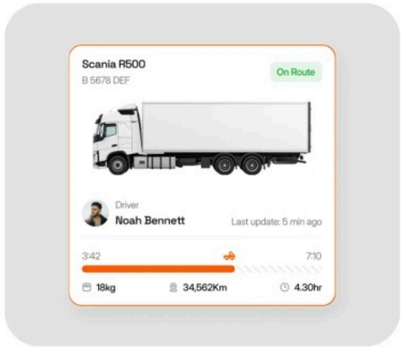

Interface Design

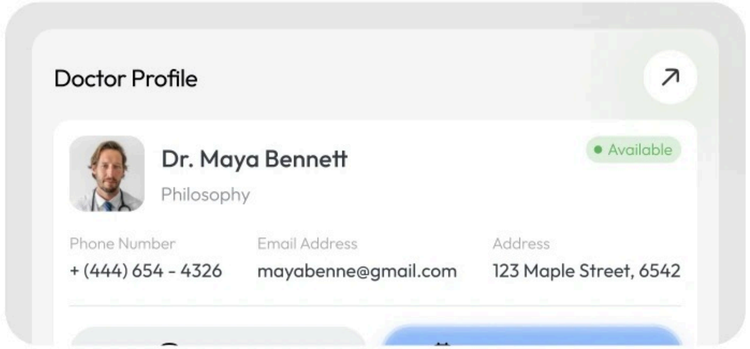

Your interface is where customers experience your product. We design clear layouts, visual hierarchy, and UI systems that guide actions while maintaining consistency.

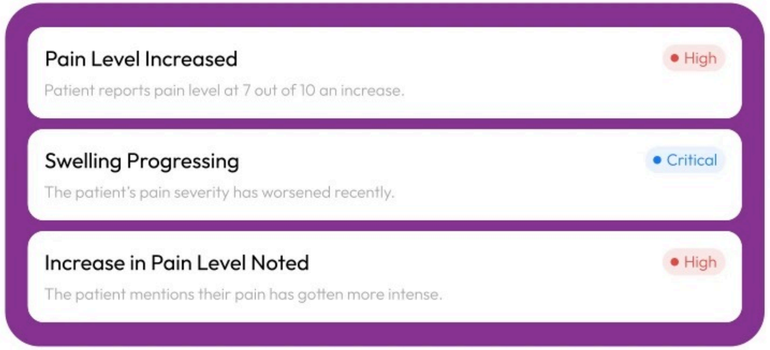

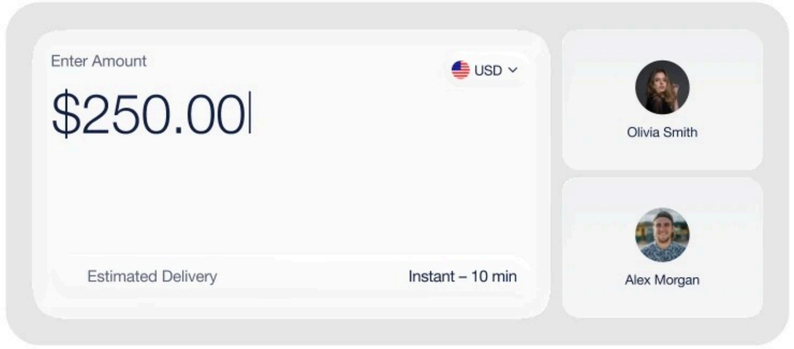

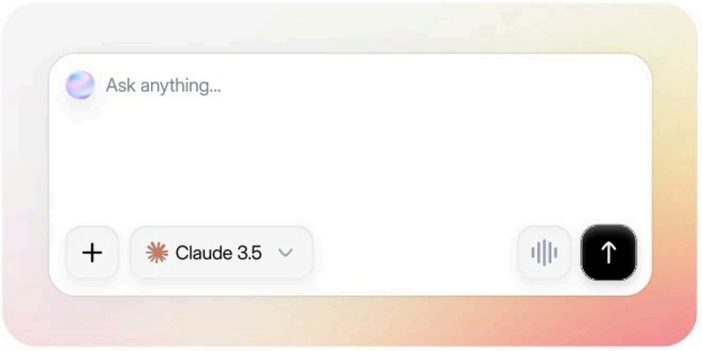

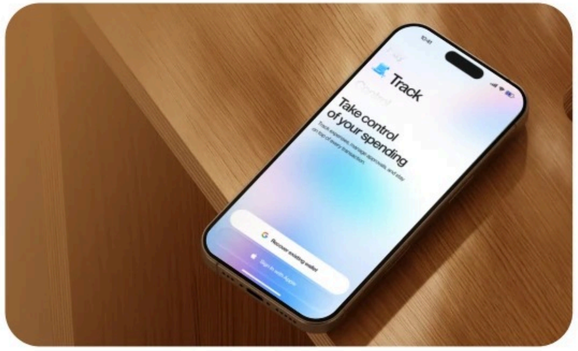

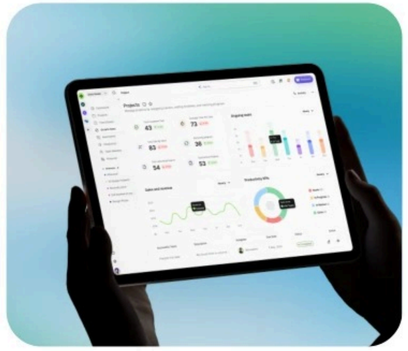

UX Architecture

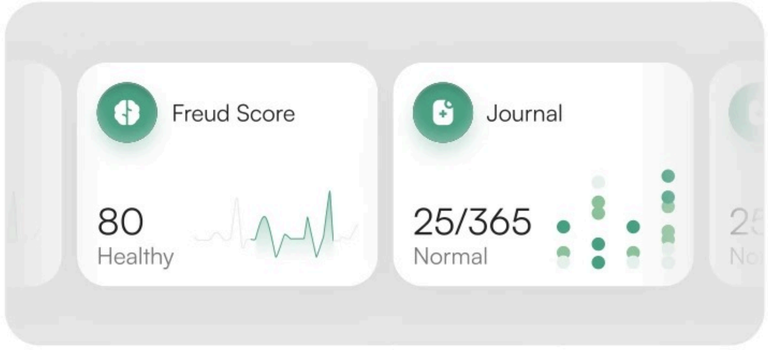

As products grow, structure becomes essential. We structure the information hierarchy and workflow logic that organize complex product systems.

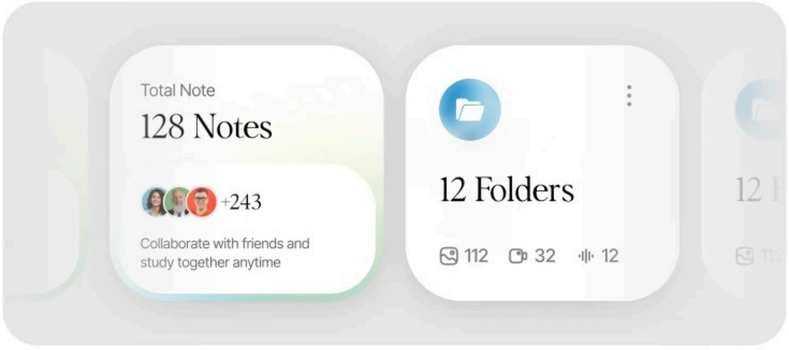

01

Product Design

Turn your idea into a product that's easy to use,& built around what your customers need.

02

Development Capabilities

Clean, scalable implementation that keeps design and engineering closely aligned.

03

Design Systems & Scalability

Reusable components and patterns that help products grow without losing consistency.

04

AI & Automation Integration

Smart workflows and automation integrated where they create real product value.

Our Full Cycle Product Design Process

From the initial plan to ongoing improvements, we help you shape, build, and refine your product.

Strategic Alignment

Objectives, stakeholder mapping, and measurable success criteria defined upfront.

System Design

UX architecture, design systems, and interface frameworks built to specification.

Implementation Support

Engineering collaboration, dev-ready handoffs, and QA validation across milestones.

Iterative Optimization

Performance tracking, feature expansion, and continuous improvement cycles.

01 Executive Discovery & Objective Definition

02 Research & Risk Assessment

03 Architecture & Experience Framework

04 Interface System Development

05 Prototype Validation

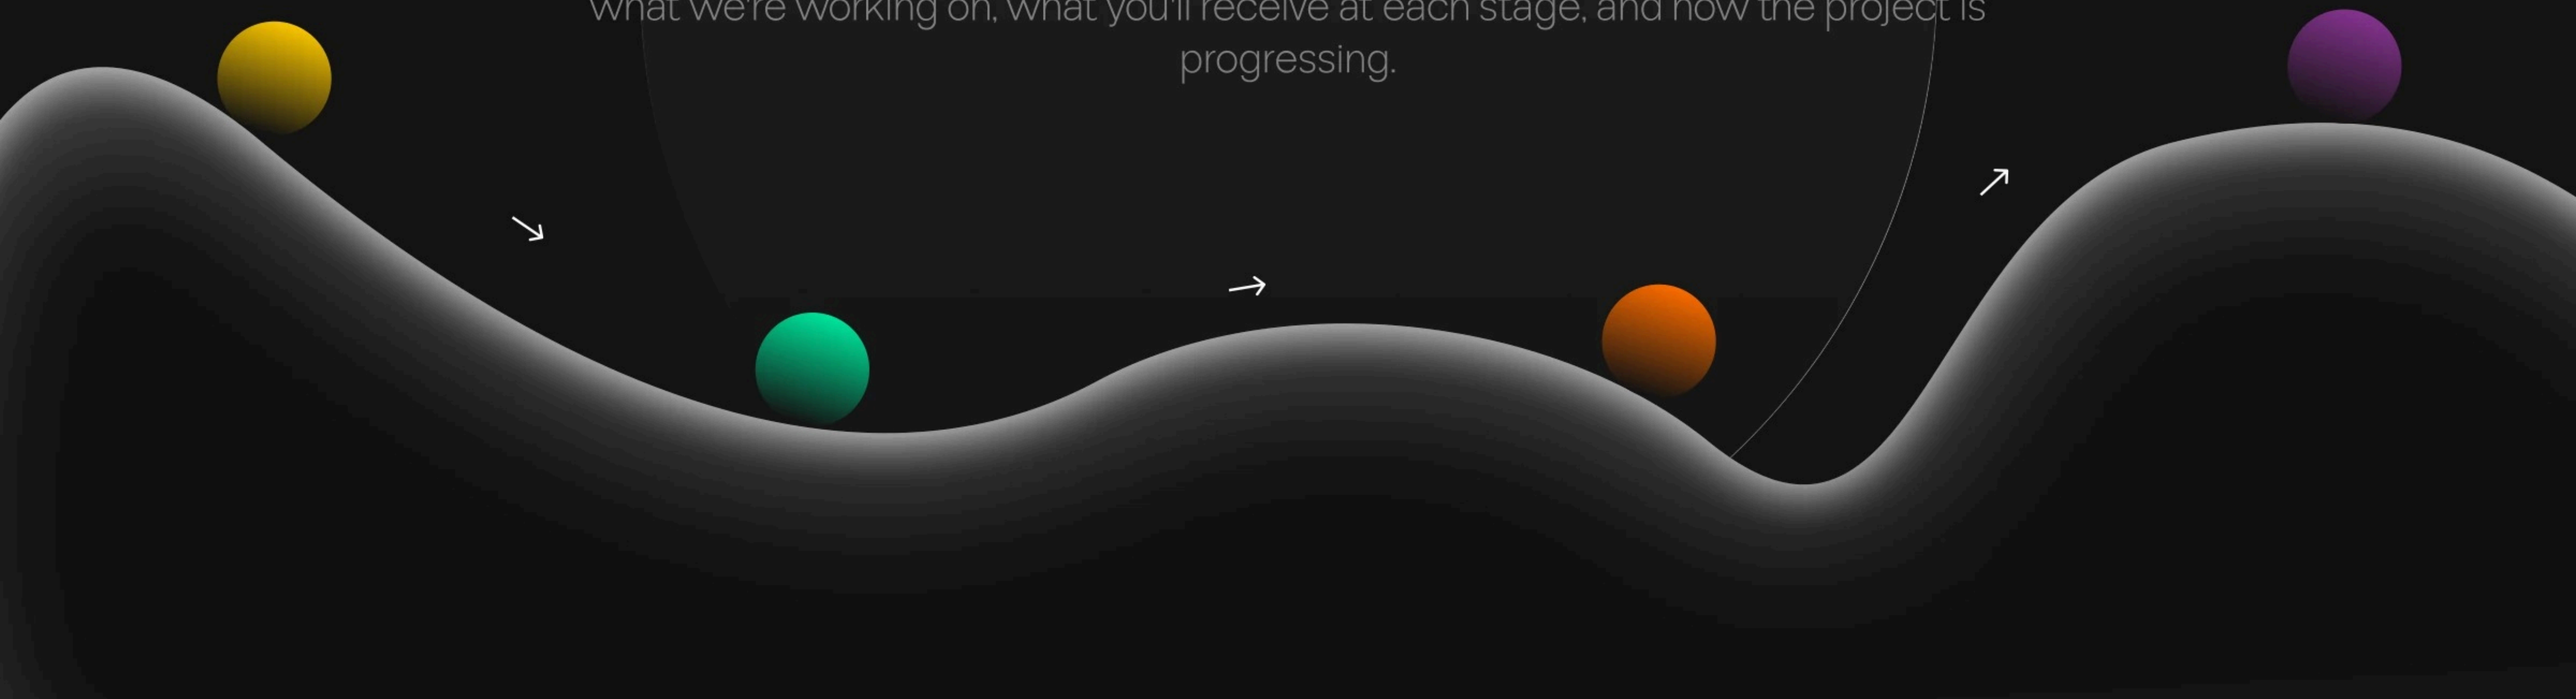

06 Engineering Alignment & Implementation

07 Quality Assurance & Performance Testing

08 Launch & Ongoing Optimization

Detailed Project Workflow

From the first meeting to launch, every project follows a clear plan. You know what we're working on, what you'll receive at each stage, and how the project is progressing.

Fewer Costly Mistakes

CATCH ISSUES EARLY.
AVOID COSTLY REWORK.

Teams Working in Sync

ALIGN TEAMS AND GOALS TO
KEEP PROJECTS MOVING.

GrowthWithout the Chaos

BUILD A STRONG
FOUNDATION FOR GROWTH.

Measured Impact

Better product experiences lead to better business outcomes from converting more users to helping teams ship faster.

01

Conversion Rate Optimization

Clearer interfaces and smoother user journeys help more people complete key actions.

02

Onboarding Efficiency

A simpler first-time experience helps new users understand your product and reach value sooner.

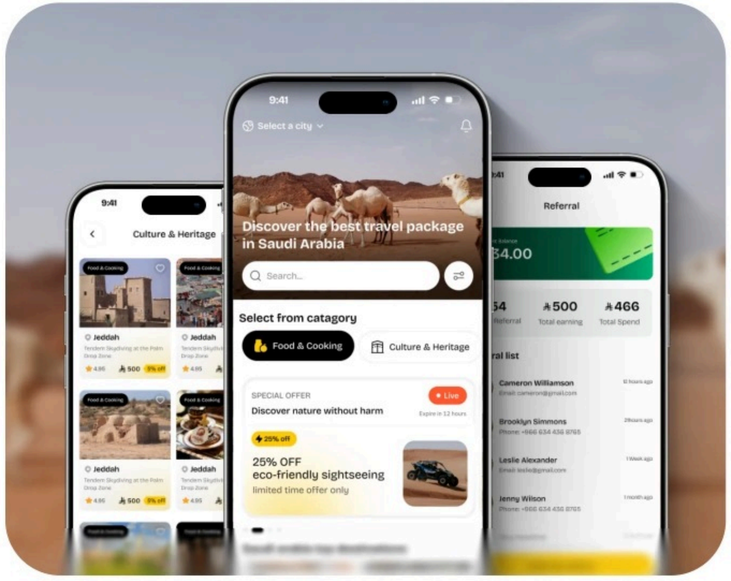

03

Feature Release Velocity

Consistent design and clear developer handoffs help teams build and release features with less rework.

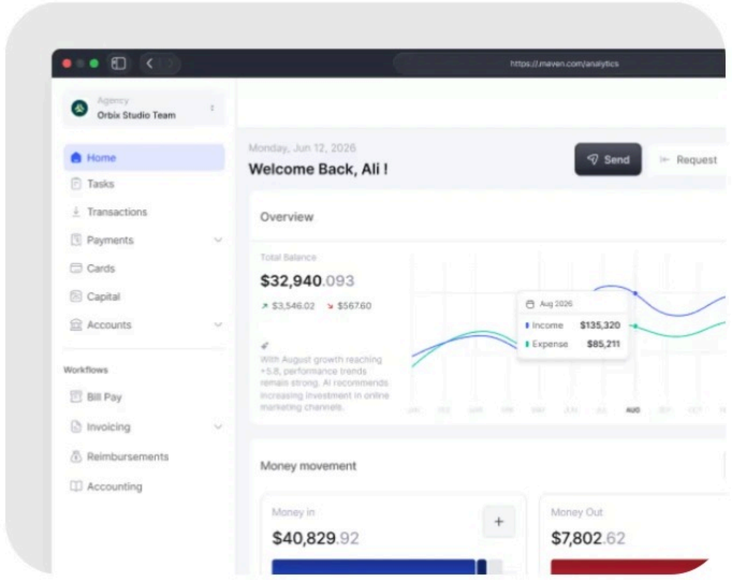

Design & Development Rework

Structured documentation and alignment processes significantly reduce costly back-and.

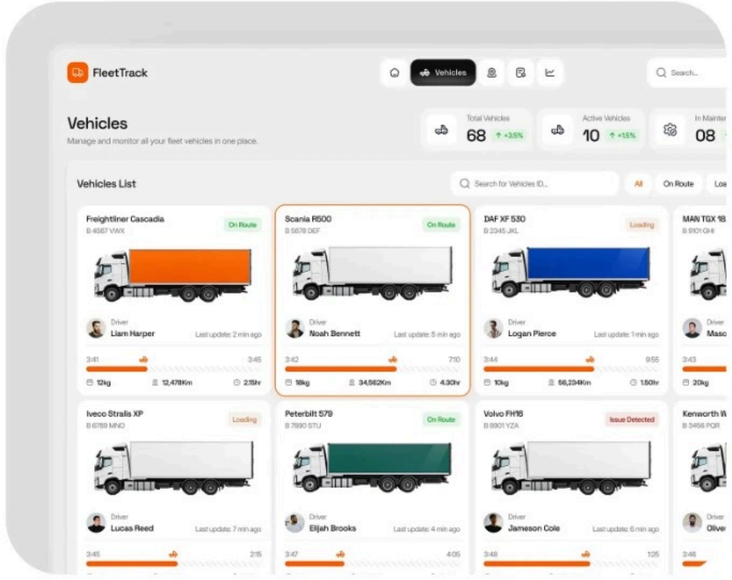

User Friction in Workflows

Clearer onboarding flows and reduced friction accelerate time-to-value for new users.

Enterprise Usability & Retention

Products designed for enterprise-grade usability experience stronger long-term retention and.

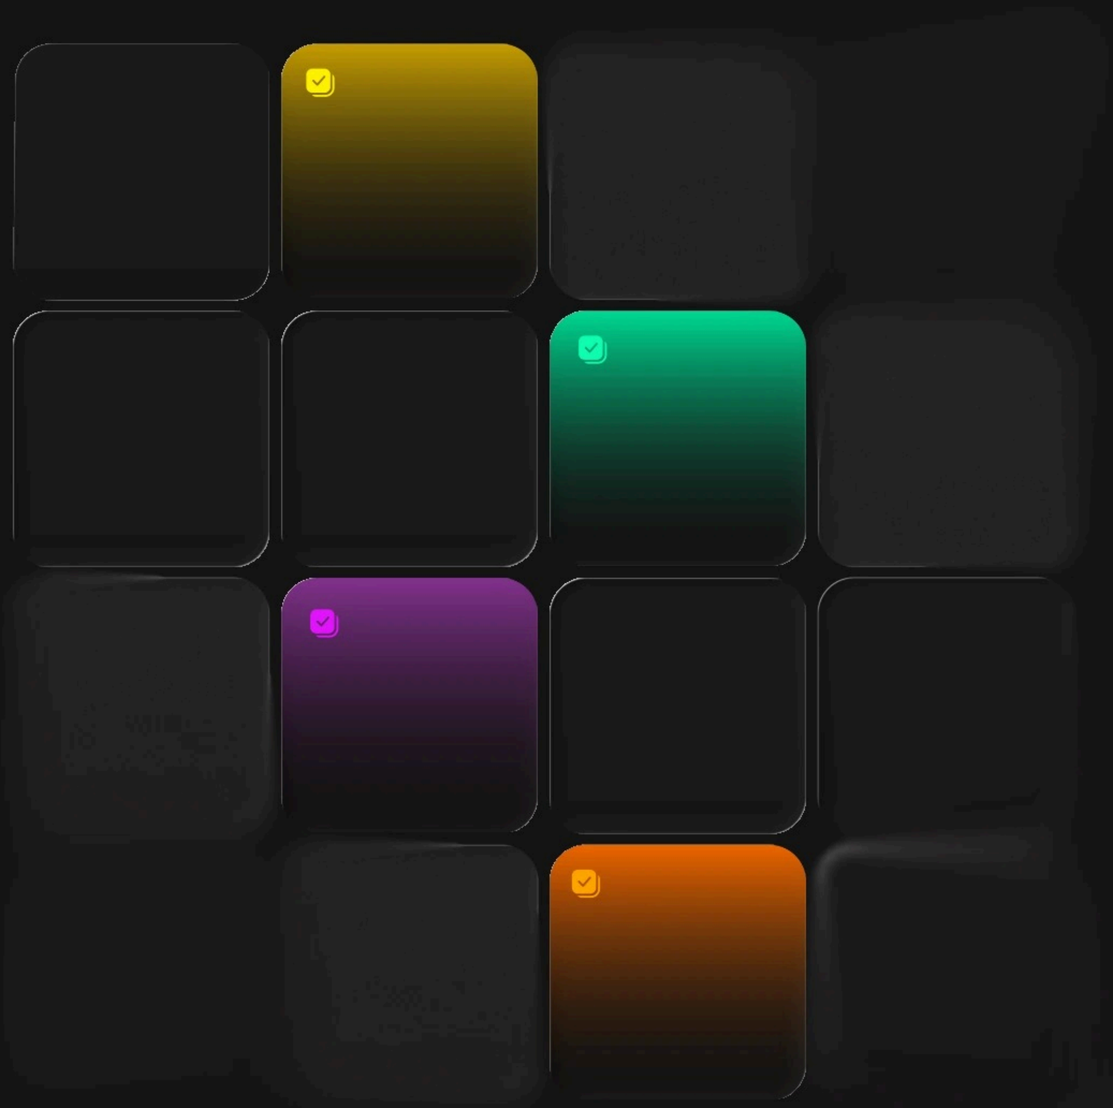

WE FOCUS ON PERFORMANCE METRICS

not visuals

output alone

Selected Work

Every engagement we take on is built around a scalable digital ecosystem that performs. Our work spans SaaS, fintech, logistics, and enterprise platforms.

Our Story

Oribix Studio started with a simple belief: digi
products should bring clarity, not complexity.
products grew, we saw brand, UX, and engin
drifting apart. Today, we help teams bring the
together to build products that scale.

Mission & Vision

Mission

TO DESIGN AND BUILD DIGITAL PRODUCTS THAT SOLVE REAL PROBLEMS, DELIVER LASTING VALUE, AND HELP BUSINESSES GROW.

Vision

TO BECOME A TRUSTED GLOBAL PRODUCT PARTNER, HELPING AMBITIOUS COMPANIES BUILD BETTER SAAS, FINTECH, AND ENTERPRISE PRODUCTS.

Our Core Values

Structure Over Noise

Clarity and systems over trends, visual excess, or short-lived design patterns.

Strategy Before Execution

Every decision is anchored in business logic and measurable objectives.

Long-Term Thinking

Products built to adapt, grow, and stay useful long after launch.

Accountability

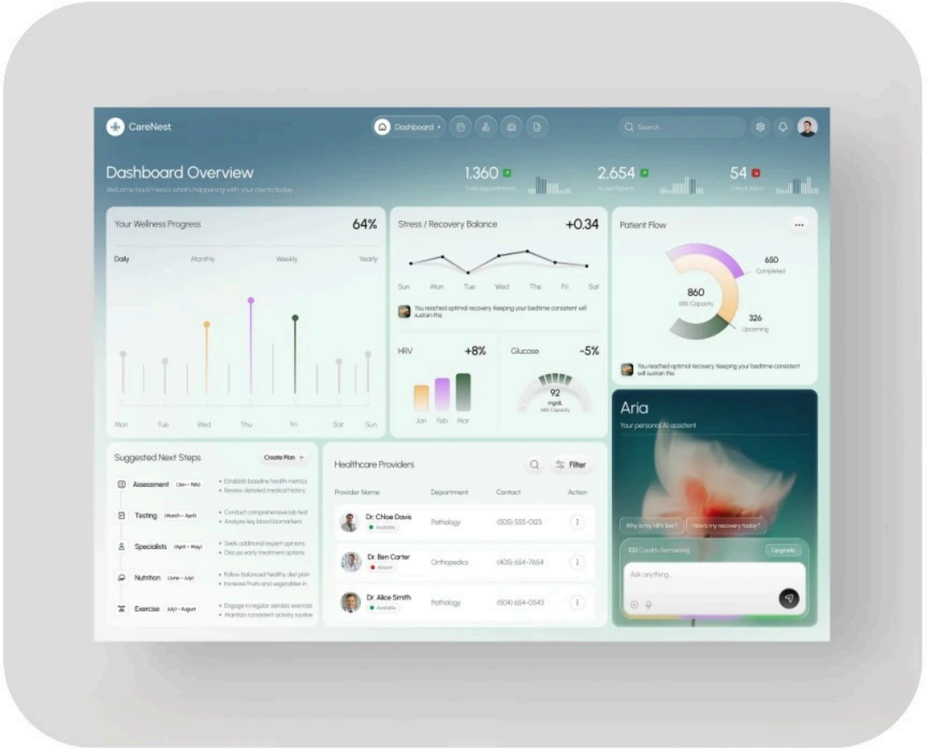

Clear deliverables, shared ownership, and transparent collaboration at every stage.

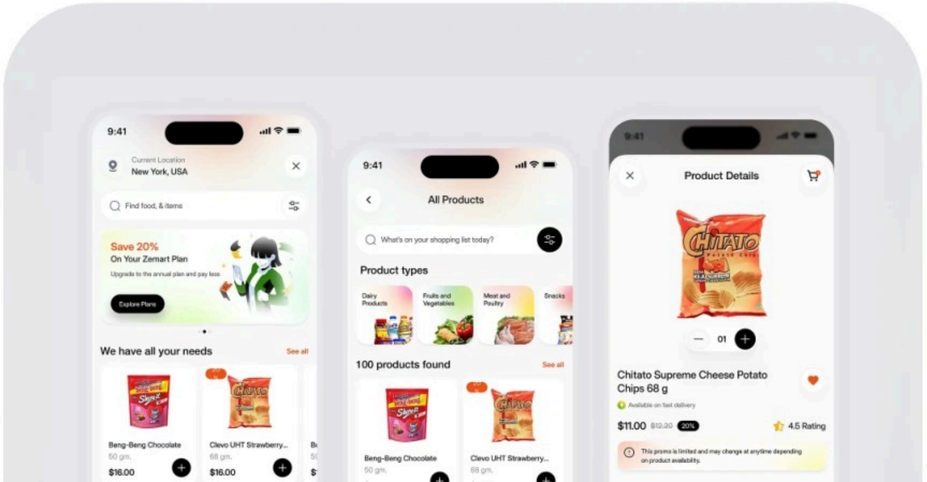

Continuous Improvement

Products get better through user feedback, careful testing, and ongoing refinement.

Product-First Philosophy

Great products start with the right idea. We focus on what matters to your users, simplify what doesn't, and turn your vision into a product built to last.

Our Team Structure

Designers and developers work as one team, from the first idea to the final build. This close collaboration gives your product the space to grow, evolve, and reach its full potential.

Projects & Delivery ↗

Departments & Capabilities

Our structure is built around three core pillars that keep strategy, design, and development aligned across every engagement.

Pilar 01

Strategy & Research

Positioning, product strategy, UX research, and architecture planning.

Pilar 02

Design & Systems

Brand systems, UX frameworks, interface design, and scalable component libraries.

Pilar 03

Development & Implementation

Front-end collaboration, system documentation, QA alignment, and performance optimization.

Remote & Global Collaboration Model

Orbix Studio brings designers and developers together from around the world to build better digital products through clear communication and close collaboration, turning bold ideas into meaningful experiences that create lasting business value.

How We Structure Engagements

Every engagement at Orbix Studio begins with clear objectives, defined scope, and aligned teams. This keeps the work focused, accountable, and moving forward from the start.

- Clear Objectives & KPIs
- Defined Scope Boundaries
- Milestone-Based Delivery
- Executive Reporting Cadence
- Governance & Approval Gates

Retainer Model for Ongoing Product Growth

As your product evolves, We stay by your side to improve existing features, build new ones, and keep your product aligned with changing user needs.

Product Launch Program

Our product launch program helps startups and enterprises reduce risk and prepare brand, product, and performance for release or relaunch.

01 **Foundation**

Positioning, product strategy, UX research, and architecture planning.

02 **Build**

Brand systems, UX frameworks, interface design, and scalable component libraries.

03 **Launch**

Front-end collaboration, system documentation, QA alignment, and performance optimization.

Our Collaboration Framework

Orbix Studio helps startups and enterprises reduce risk and prepare brand, product, and performance for release or relaunch.

01 **Executive kickoff alignment:** Objectives, roles, and success criteria defined before work begins.

02 **Defined stakeholder roles:** Clear ownership across client and Orbix teams with no ambiguity.

03 **Weekly sprint reviews:** Progress updates with documented outcomes and next steps.

04 **Milestone reporting and documentation transparency:** Clear progress, documented decisions, and milestone visibility.

Average Project Timelines

Project timelines depend on the scope, complexity, and feedback involved. These estimates cover the full process, from initial research and design to development handoff.

Brand Strategy	4–8 weeks
Marketing Website (Design & Build)	6–16 weeks
SaaS Product Design	8–24 weeks
Enterprise Dashboard Systems	12–32 weeks
Design System Development	6–12 weeks

Investment Ranges

Project pricing varies based on scope, complexity, and product requirements. The ranges below reflect common engagement ranges.

Brand Systems	$15K – $50K
Marketing Website (Design & Development)	$25K – $80K
SaaS Product Design	$30K – $120K
Enterprise Product Systems	Custom Scoping
Retainer Partnerships	Custom Monthly Structure

What Sets Us Apart

We combine thoughtful design, technical expertise, and business goals to build products that solve real problems, deliver measurable results, and grow with your business.

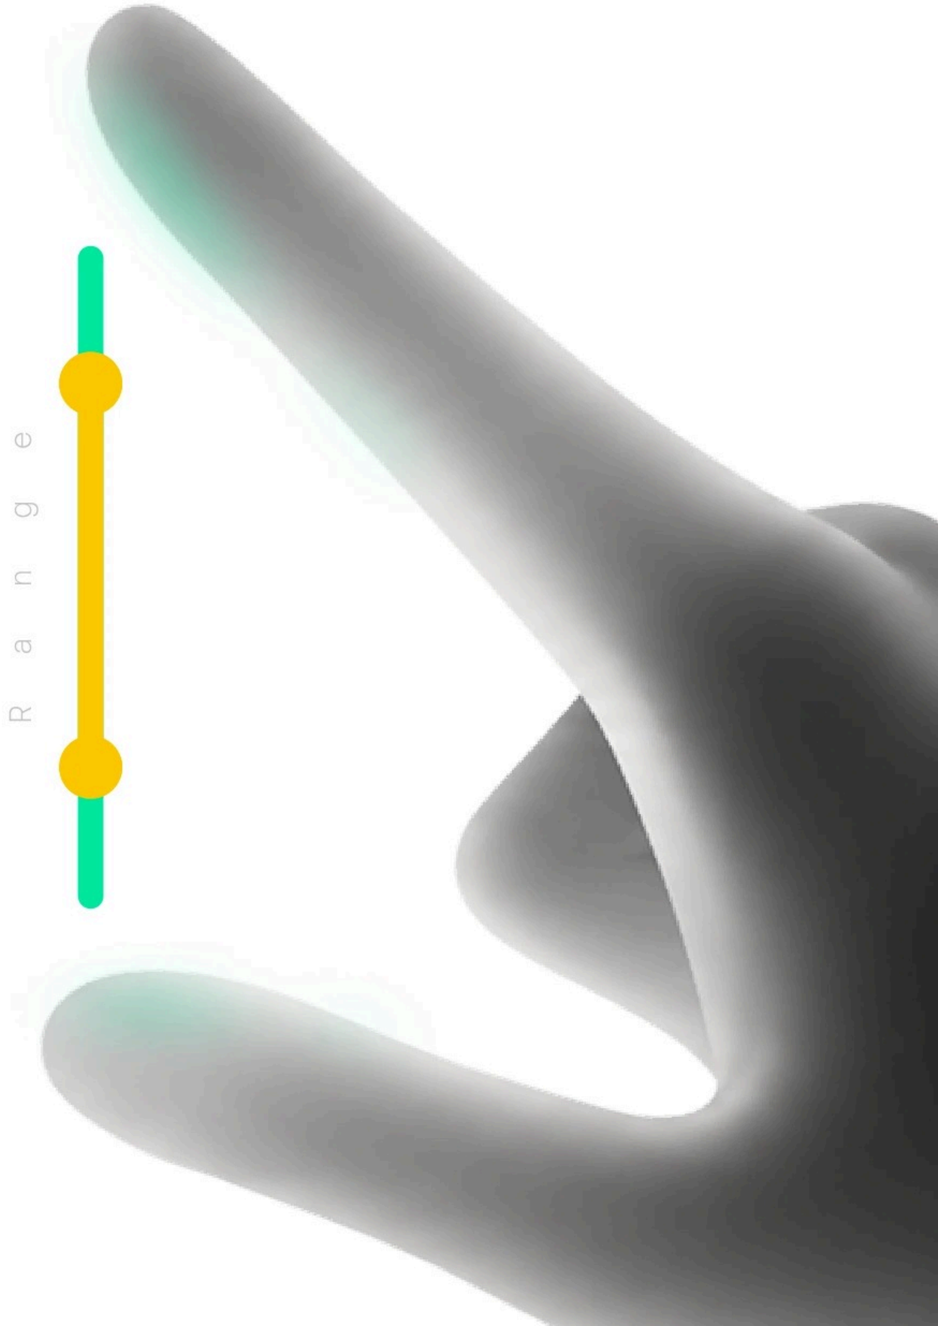

01	**Full-Cycle Integration**	Brand, UX, and product built as one system.
02	**System-First Thinking**	Scalable systems designed for growth.
03	**Executive-Level Alignment**	Clear communication and faster decisions.
04	**Measurable Impact**	Focused on performance and real outcomes.
05	**Long-Term Partnership Mindset**	Ongoing support beyond launch.

LET'S BUILD WHAT MATTERS

Orbix Studio partners with organizations that take their digital infrastructure seriously.

Service Pricing Ranges

Every project is different. Our pricing ranges reflect the work involved, from focused design projects to complete product development.

Strategy & Research

Product Strategy & Positioning	$15K – $40K
UX Research & Architecture	$12K – $35K
Product Audit & Optimization	Custom Scope

Brand Systems

Brand Strategy	$20K – $60K
Visual Identity Systems	$15K – $45K
Full Brand & Product Alignment Program	$40K+

UX & Interface Design

Marketing Website Design	$18K – $50K
SaaS Product Design (MVP)	$30K – $90K
Enterprise Product Systems	$60K – $150K+
Design System Development	$20K – $55K

Development Support

Frontend Implementation (Product)	$25K – $120K
CMS & Website Development	$20K – $70K
CMS & Website Development	Custom Scope

Average Hourly Rate

$50 – $99 / hour

Depending on specialization and scope

How We Work

Every engagement starts with your goals, scope, and priorities. We focus on delivering meaningful results, building products that can grow, and making the most of your investment.

Contact & Next Steps

Let's talk About Your Product

Start with a discovery call to align on your goals, challenges, and next steps.

Step 01

Alignment Call

Goals, priorities, and current state.

Step 02

Scope & Proposal

Deliverables, timeline, and investment.

Step 03

Roadmap & Kickoff

Plan, team alignment, and project launch.
